

CASE BRIEF

Uncovering the Atlassian
Customer Experience

UNSW DataSoc x Atlassian Datathon 2026

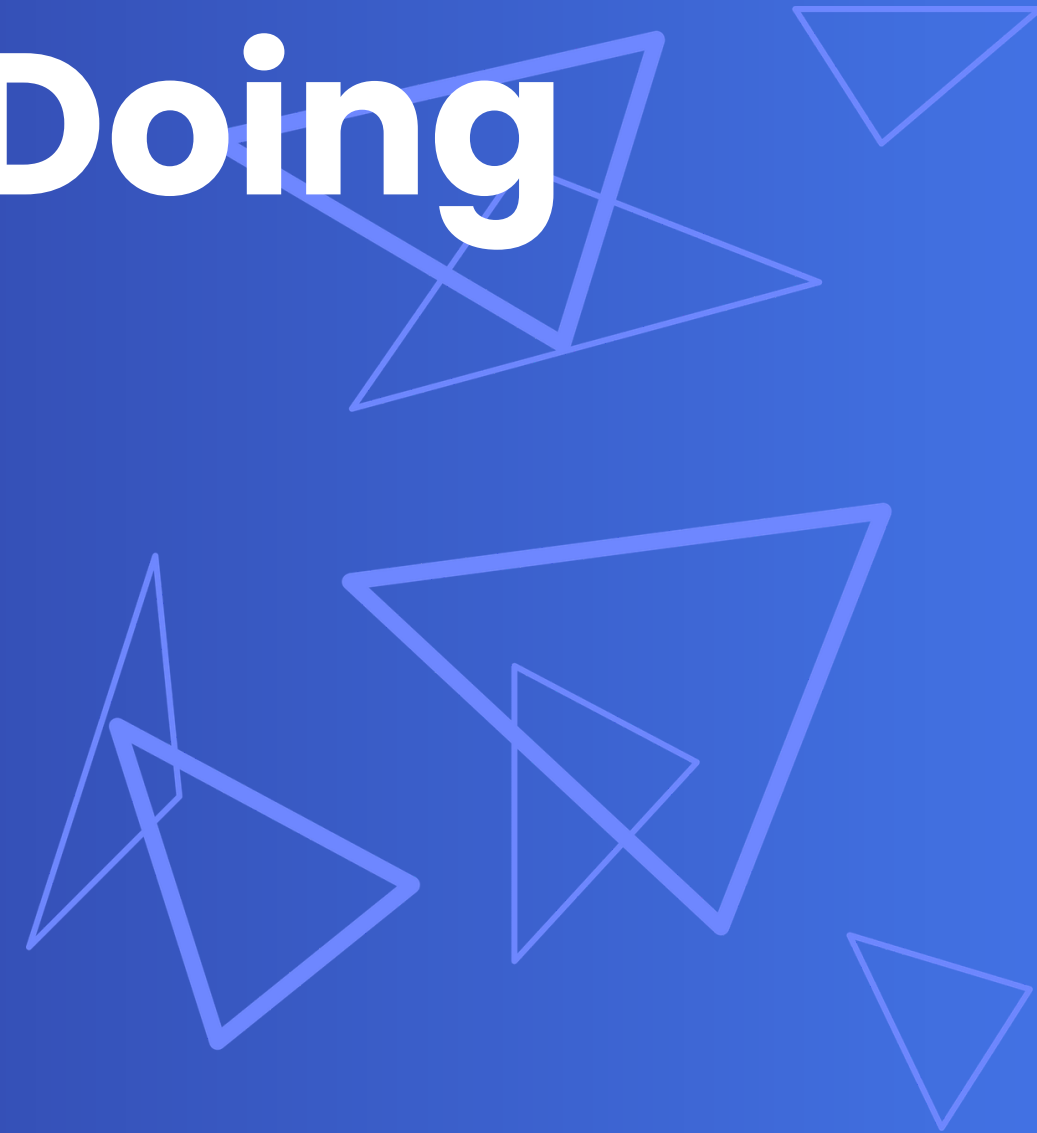

THE CHALLENGE

How can Atlassian better leverage raw support ticket data to understand customer experiences and sentiment, and ultimately protect business value?

This datathon, step into the role of an **Atlassian Data Scientist and Machine Learning Engineer**.

What You're Really Doing

*Look beyond individual tickets to uncover the bigger story behind Atlassian's customer experience. Use the data to understand how **customer sentiment and experiences** connect to broader business outcomes, identify where meaningful opportunities exist, and translate your findings into **clear, actionable recommendations** that can create lasting value for both Atlassian and its customers.*

Your Data Playground

You'll work with a rich dataset of raw customer support tickets including detailed **customer information**. As an Atlassian Data Scientist, analyse and discover the real patterns lying within.

- 300,000+ users across Jira, Confluence, Trello & Bitbucket
- 8469 tickets
- 24 months of data (Jan 2020 → Dec 2021)

See the README file for a data dictionary

YOUR TASK

Deliver a solution, backed by data-driven insights on a **problem of your choice**. Teams should explore the dataset and define a **story that is impactful to Atlassian and its customers**. Conduct analysis to uncover insights and transform your findings into an actionable solution for Atlassian teams to implement. Feel free to go beyond these points while referring to the judging criteria.

1

Define Your Story

- What is the problem you are trying to solve and why is it important?
- How will your outcome affect Atlassian and its customers?

2

Present Insights

- What are the key data-driven insights related to your story?
- What techniques were used to extract these insights?

3

Build or Recommend a Solution

- What actions should Atlassian take from here, based on the insights uncovered?
- What will a solution look like? How would it be implemented?

WE WANT STORY + IMPACT, NOT CODE

What sets a winning solution apart?

❌ "Here's my model with 90% accuracy"

✅ "Here's why 23% of customers are at risk and what to do about it"

❌ Complex technical deep-dives

✅ Clear insights that Atlassian / stakeholders can act on ASAP

❌ Just showing charts

✅ Showing what they mean and why they matter

Know your audience: BUSINESS LEADERS making decisions, not just engineers looking for the technical side

GO FIND YOUR STORY

Suggested directions (but feel free to explore beyond these):

- *What does support ticket data reveal about customer sentiment and experience?*
- *What are the biggest drivers of positive or negative customer experiences?*
- *How do customer experiences connect to broader business outcomes?*
- *Where are the biggest opportunities to improve engagement and customer value?*
- *How can AI help uncover insights and improve customer experiences?*

REMEMBER: A sophisticated model means little if you can't explain why the insight matters.

MAKE US BELIEVE IN YOUR STORY.

SUBMISSION & CRITERIA

Teams must submit a PowerPoint or PDF by 3pm Monday 14 September. Decks will be screened, with teams making the heats notified by end of day. At the Atlassian office, heats teams will have 8 minutes to present + 4 minutes for Q&A, with finalists presenting in the same format.

[SUBMISSION LINK](#)

15%

Story & Problem Statement Definition

Assesses the **relevance, impact and clarity** of the story and problem statement. The problem should be **clear and convincing**.

30%

Analysis and Data - Driven Insights

Assesses the **depth, quality and innovation** of the analysis, with a focus on insights beyond the surface level.

35%

Solution & Recommendation

Assesses how clearly solutions and recommendations are tied to the **analysis and context**. Solutions should be **effective and feasible**.

20%

Presentation & Q&A Performance

Evaluates the quality of **presentation**, considering **visual flow, communication and verbal delivery**.

GOOD LUCK, HAVE FUN!

And remember to be proud of
what you've learnt!
